## **DETAILED ACTION**

1. Applicants election of Group I (claims 9, 13, 16-19) on 12/20/2005 is acknowledged.

Upon further consideration, it was determined that the elected Group encompasses two distinct inventions.

## Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 9, 13, 16-17, are drawn to a polypeptide of amino acid sequence of set forth in SEQ ID NO:6, classified in Class 530, subclass 351.

Group V. Claims 18-19, are drawn to a N-terminally truncated fragment of the polypeptide of amino acid sequence of set forth in SEQ ID NO:6, classified in Class 530, subclass 351.

Should any one of the Groups from I and V be elected, Applicant is required to select one polypeptide. Any change of amino acid residues at any one or more positions in the polypeptide sequence is considered, absent factual data to the contrary, a distinct polypeptide. Once one polypeptide sequence is selected, all other sequences will be withdrawn from consideration.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and V are independent and distinct, each from the other, because each of the polypeptides are materially different products, which are structurally and chemically different, capable of separate manufacture and use. The products in the different Groups are physically and chemically distinct from each other, and if patentable would support separate patents. Distinctness is further shown because a search of one of the polypeptides would not necessarily

Art Unit: 1646

reveal art pertinent to the other and each of these products can be made and used without any one or more of the other products. Separate searches would be required for searching each of the polypeptide products eg. a search of the literature for the polypeptide of SEQ ID NO:6 would not necessarily reveal art for the N-terminally truncated fragment of the polypeptide of amino acid sequence set forth in SEQ ID NO:9. Therefore, each of the polypeptides are not related and are properly restrictable in accordance with MPEP § 806.04 and MPEP § 808.01.

Having shown that these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter as defined by MPEP. § 808.02, the Examiner has prima facie shown a serious burden of search (see MPEP.. § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

## Advisory Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prema Mertz whose telephone number is (571) 272-0876. The examiner can normally be reached on Monday-Friday from 7:00AM to 3:30PM (Eastern time). Art Unit: 1646

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres, can be reached on (571) 272-0867.

Official papers filed by fax should be directed to (571) 273-8300. Faxed draft or informal communications with the examiner should be directed to (571) 273-0876.

Information regarding the status of an application may be obtained from the Patent application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
